Proposition Number One - 50% Property Tax Reduction

YES

Property taxes have risen on average 71% across the state in the last 6 years. Some homeowners have been priced out of the market due to these increases alone, and seniors on fixed incomes risk losing their homes altogether for taxes. The state of Wyoming can easily afford this cut - it equates just 5% of the annual interest earned on the $40 billion in reserve accounts. No school, emergency service or utility need suffer, unless a politician chooses not to prioritize it.

Ballot Proposition No. 1 - Optional 1% Tax

NO

This tax was originally intended to be spent on necessary infrastructure. And yet millions are spent annually on yet more recreation, beautification and an increasing portion to non-profits that many in the community object to. Let's limit use of tax money to things we need so that all voters can support it.
